PHYSICAL PROPERTIES OF MATTER

Fill in the blank using the word bank below. You will use answers more than once!

magnetism	reflectivity	matter	solubility	volume	temperature
states of matter		mass	conductivity	physical properties	

- _____ measured in liters (or milliliters)
- _____ how hot or cold something is
- _____ anything that has mass or takes up space
- _____ describes how energy, such as electricity or heat, can move through.
- _____ the amount of space something takes up
- _____ measured in degrees Celsius
- _____ how much matter is in something
- _____ measured using a graduated cylinder
- _____ whether something is a solid, liquid, or gas
- _____ whether something is attracted to a magnet
- _____ measured using a thermometer
- _____ measured in grams
- _____ is the way light reflects, or bounces off an object.
- _____ a property of matter that can be measured or observed using the 5 senses.
- _____ is the ability of matter to dissolve in a liquid.
