

Associate-Level Material

Stages of Critical Thinking

Stages of Critical Thinking

Complete the matrix by identifying the six stages of critical thinking, describing how you would best reach each stage in the real world, and listing strategies you may have or your instructor has used to reach each stage of critical thinking.

| Stages of critical thinking | How to reach or be used stage | Strategies for reaching to the next stage |
|-----------------------------------|---|---|
| 1. Identify the problem, question | Identify by thinking in already problems that affect my thinking. | Identifying myself, identify relationships on my thinking |
| | | |
| | | |
| | | |
| | | |

Write a 100 to 150 word explanation of your chosen stage of critical thinking development and explain why you placed yourself at that stage. Define your paragraph structure and describe a real-world type of real-world problem.

Strategies to Develop Critical Thinking

Now that you identified your current stage in critical thinking, it is necessary to find strategies to develop your thinking. Write two paragraphs you read about the work, describe them and why you hope to practice. Identify the strategies and describe how you can implement each strategy in your daily life.
