

## A Beach Day

Use a centimeter ruler and the map scale to find the distance between each pair of places.

(Hint: Measure to the closest centimeter.)

1. the parking lot path and the beach chair \_\_\_\_\_ yards
2. the snack shop and the seashell sales chair \_\_\_\_\_ yards
3. the umbrella stand and the beach chair \_\_\_\_\_ yards
4. the lifeguard stand and the snack shop \_\_\_\_\_ yards
5. the beach chair and the lifeguard stand \_\_\_\_\_ yards
6. the parking lot path and the umbrella stand \_\_\_\_\_ yards
7. the snack shop and the beach chair \_\_\_\_\_ yards
8. the umbrella stand and the snack shop \_\_\_\_\_ yards
9. the lifeguard stand and the parking lot path \_\_\_\_\_ yards
10. the seashell sales chair and the beach chair \_\_\_\_\_ yards

**Bonus Box:** Sarah crawls from the beach chair to the snack shop. Then she crawls to the umbrella stand. Scott crawls from the parking lot path to the lifeguard stand. Then crawls to the snack shop. Who crawls farther? \_\_\_\_\_
