

# CELL BOUNDARIES

Answer the questions below.

What are the function of cell membrane?

What is the difference in the function of the proteins and the carbohydrates attached yo a cell membrane?

What is the main function of the cell wall?

What are plant cell walls mostly made of?

What is the concentration of the a solution?

What is diffusion?

What is osmosis?

When will water stop moving across a membrane?

What is the role of protein channels in the cell membrane?

Complete the table about the types of active transport below.

TYPES	DESCRIPTION
ENDOCYTOSIS	
PHAGOCYTOSIS	
EXOCYTOSIS
