

Perpendicular Lines (H)

Construct a line perpendicular to the segment through the unlabeled point.

1.

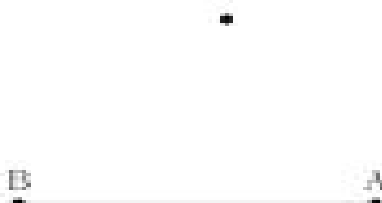

A horizontal line segment with endpoints labeled B and A. A single unlabeled point is located below the segment.

2.

A horizontal line segment with endpoints labeled B and A. A single unlabeled point is located above the segment.

3.

A horizontal line segment with endpoints labeled B and A. A single unlabeled point is located above the segment.

4.

A horizontal line segment with endpoints labeled B and A. A single unlabeled point is located below the segment.
