

## The EASY Logic Problem

From: Swair (<http://swair.wordpress.com>)

*A father took his three daughters out for a three-course meal. Each ordered a different type of soup, a different main course, and a different sweet. From the clues given below, can you work out the full details of what each daughter ate?*

- 1-** The diner who chose an omelette to follow her mushroom soup was not Mavis.
- 2-** The lady who ordered tomato soup finished off her meal with ice-cream.
- 3-** Carla's meal started off with turtle soup.
- 4-** The smoked salmon was rounded off with a chocolate mousse.

	Mushroom	Tomato	Turtle	Beef	Omelette	Salmon	Ice-Cream	Mousse	Spotted Dick	
Carla										
Dora										
Mavis										
Ice-Cream										
Mousse										
Spotted Dick										
Beef										
Omelette										
Salmon										

The Answers:

Name	Soup	Main Course	Sweet
