

HOW TO DRAW BLOSSOMS OF A TREE

Start with a light pencil like a 2B and draw five or three circles. Make five marks evenly spaced around the circle.

Draw a small circle in the center.
Draw five circles/circles each touching the center and touching the five marks.
Don't make them perfect, make them interesting.

Draw the leaves with two sweeping lines that curve out and then back.

Place the leaves behind the blossoms.

The buds are smaller circles at the end of a tiny line. Draw two curved through the buds to make individual petals.
The branch is not straight but a little zig-zag. Use short choppy lines to give texture.

Draw the entire blossom.
