	How to	o Op Art
After drawing a flat grid - draw a hape, that you want to "pop" from he surface. In this case - it's a circle.	Erase the grig inside the shape. Erase the outline of the shape itself.	Redraw of each step in the box below Now connect the broken vertical line with a curve segment. Make the left segments curve to the left, the right segments - curve to the right.
heck that the lines are continous.	Curve upper segments upward; Curve the lower segments downward.	
heck that the lines are continous.	Curve upper segments upward; Curve the lower segments downward.	
heck that the lines are continous.	Curve upper segments upward; Curve the lower segments downward.	
heck that the lines are continous.	Curve upper segments upward; Curve the lower segments downward.	
heck that the lines are continous.	Curve upper segments upward; Curve the lower segments downward.	
Complete all vertical lines. Double-theck that the lines are continous. Then complete horizontal lines.	Curve upper segments upward; Curve the lower segments downward.	
heck that the lines are continous.	Curve upper segments upward; Curve the lower segments downward.
