ANIMAL ADVENTURES

Below are some activities to help you learn more about animals.
Select _____ activities to complete by _____.
Color the pattern hat of each activity you complete.

1. Winter is almost over and spring is right around the corner. Make a list of five different behaviors of animals during each of these seasons.

2. Pretend you are an animal that lives in a forest, jungle, grassland, tundra, or desert. Write a letter to an animal living in a different habitat. In your letter explain how you've had to adapt to your environment to survive.

3. Make a web that shows how an animal in your state survives its environment, moves, eats, communicates, and defends itself.

4. Research the features and behaviors of a baby animal. Then create a decorative birth announcement that includes a description of these characteristics.

5. Search for facts about the largest, fastest, loudest, or strongest animal. Create a postage stamp promoting this animal's unique quality.

6. Make a big book to share with a primary class. In the book, feature an unusual animal. Describe where the animal lives; what it looks like; what it eats; and how it moves, communicates, and defends itself.

7. Create an imaginary animal using various recyclables and arts-and-crafts materials. Include features that will help your animal survive in its environment.

8. Choose an animal. Pretend that the animal must be able to survive in a habitat different from its own. Draw a picture of the animal, adding to or changing its physical features.
