

# The Green Sea Turtle

Color this placemat and learn some simple facts about the Green Sea Turtle!

☆ Adult sea turtles can grow to 3 feet (1.3 m) long and average between 200-400 pounds (90-180 kg).

☆ Sea turtles can live up to 80 years.

sea sponge

☆ Young green sea turtles are omnivores. This means they eat other animals and plants. They like jellyfish, sponges and other invertebrates.

jellyfish

☆ As a sea turtle gets older, they are mostly herbivores. This means they only eat plants. They usually live in shallow waters and feed on seagrasses or marine algae.
