

Instructions for Making a Water Wheel

Now that you've printed out the two sides, it's time to make your water cycle wheel! Color the pictures on the two big sheets with your favorite colors. When you are finished coloring, cut out the two circles and the four cut paths that are on circle 1. Attach the two circles together (one on top of the other) with a metal fastener through a hole in the center. Put the stick with the cut outs on top. Using the hole on circle two, turn the stick counterclockwise and see the water cycle at work!
