

Conservation dictionary

Make your own science dictionary by collecting words from the news, newspaper and the presentation of pollution. Here are some words to start you off.

| Publication | Constituents | using | Report | Applications |
|-------------|--------------|------------|-------------|--------------|
| number | atomsphere | fixed beds | environment | |

Now find some more words yourself, and write them here. You may want to see reference books or the Internet to help you.

Put the conservation words in alphabetical order, and write a short definition for each one. The definitions should be easy to understand. The first one has been done for you.
