

A-MAZE-ING PLANTS

NAME _____

DATE _____

What to Do

1. Build the maze. Cut pieces of cardboard as wide as the box to make dividers. Tape in place.
2. Ask an adult to cut a hole at the top of the box. Put your plant inside at bottom. Tape the lid on. Place box in a sunny spot.
3. Check your plant every few days. Each time, draw what you see on the maze here. Water plant if the top of the soil is dry.

Each time you observe the plant, use a different color to draw how it is growing. Record the color and date here.

How It Grows:

Measure your plant when it grows out of the box: _____ inches (centimeters)

Measure the control plant: _____ inches (centimeters)

On the back, write why one plant might be longer.
