MYTHBUSTERS

The Scientific Method in Action

THE SCIENTIFIC METHOD:

Question → Hypothesis → Experiment → Observe/Collect Data → Conclude → Communicate

1. What is the QUESTION in the episode? _____

2. What was Buster's hypothesis? _____

3. What is "FOCUS" hypothesis? _____

4. How did they conduct their experiment? _____

5. What did they conclude? _____

6. Was your hypothesis correct? _____

Remember that it's OK for your hypothesis to be incorrect! It's all part of the learning process. Without a hypothesis, you will never be able to be 100% involved in your experiments and you'll never be going anywhere.
