

$$40. 5x - 30 = 2x + 12$$

Write each equation in slope-intercept form.

$$41. 75x - 45 = 30x$$

$$42. -200 = 5x + 75x$$

$$43. 3 = 25x + 100$$

$$44. 5x = 45 = 10$$

$$45. 4x + 6 = 45 = 7$$

$$46. 300x = 30 = 45 = 5$$

$$47. 75x = 7 = 45x$$

$$48. 5x = 45 = 10$$

$$49. 25 = 45 = 100$$

$$50. 100 = 10 = 75 = 7 = 42$$

$$51. 75(2x + 3) = 45x$$

$$52. 100(200 = 75 = 100 = 4$$
