

## Angles in Circles Remedial Worksheet Pure Math 20

**Background Information** – You will need to use this information to complete the worksheet that follows.

**Central angle** – an angle formed by radii of a circle.

**Inscribed angle** – an angle formed by connecting two points on the circumference of a circle to another point on the circumference.

**Angle Properties:**

1. Angles in a Circle Theorem

The measure of the central angle is twice the measure of an inscribed angle subtended by the same arc.

2. The angle inscribed in a semicircle is a right angle.

3. Inscribed angles subtended by the same arc are equal.
