

ACN Inc. is consolidating all U.S. operations, including HR, billing, provisioning, IT, and customer care in Concord, NC. They will be filling positions in all departments and across all levels. All applicants please submit resumes on line at ACNjobs.com as they need to be posted in the system to be considered and feel free to send MS Word resumes to Mark Woodward with cover letters at Mwoodwar@acninc.com.

The departments reporting to Mark are responsible for the recording, reporting, review and analysis of monthly financial results related to top-line North American revenue and cost of goods; system development to innovate, implement and support new product development and gross margin reporting/analysis; and providing centralized reporting support to all divisional departments. No relocation is currently being offered for these positions.

The Company

ACN is the world's largest direct selling telecommunications company offering highly competitive services to consumers and small businesses in North America, Europe and Asia Pacific. ACN's outstanding product portfolio includes:

- Local and Long Distance services
- Internet services
- Wireless
- Digital Phone Service with Video Phone, operating on ACN's own state of the art network

ACN is able to offer impressive alternatives to these services and pass along tremendous savings by marketing directly to consumers through thousands of commission based Independent Business Representatives worldwide. ACN has earned the loyalty of hundreds of thousands of customers since operations began in 1993.

++

Title: Senior Financial Analyst Revenue Management
Location: Concord, NC (Charlotte, NC)
Salary: \$50K to \$65K

Responsible for North American monthly revenue close process, financial reporting, and regulatory reporting.

Successful candidates will:

- Record monthly telecommunications revenue to general ledger.
- Analyze monthly financial results. Provide variance analysis and trending analysis.
- Provide monthly gross margin statistical reporting to executive management team.
- Responsible for regulatory compliance process. Includes interpretation of industry tariffs/data requests, implementation of new regulatory reporting to support product launches, and timely reporting to both state/federal regulatory bodies.
