1^{st} Grade Math Learning Menu

Objects in the real world come in groups. Go on a scavenger hunt within your classroom, school, or home to find out things that come in groups of twos, fives, and tens. Example: A pair of shoes comes in twos. Draw and write

Breakfast

Design a math bingo game that shows your knowledge of addition and subtraction. Create five bingo cards that have five squares across and four squares down. On each of the squares, write a number. Write each number

Explore all the different ways to get to 11, 12, 13, 14, and 15 using addition and subtraction. Create a poster or other visual form for each number showing all the different combinations that you created.
