Fill out the following for US Camera-ready Label requests or for any Canadian information request.

Product: _____ Type of packaging (e.g., can, box, clamshell, bag, tray with cushion, etc.): _____ Type of packaging: _____

Package dimensions (height x width x depth OR height x circumference): _____

Area available for labeling (square inches or square centimeters): _____

Area available for labeling (any part of the package that can be used for any type of labeling): _____

Size of UPC code (for Canadian Information Requests): _____

Component - If a product, such as a loaf of bread, has only one component, you will fill out just one line and list "bread dough" as the component name. If a product has several components, such as an angel food cake, you will have one line for the cake batter and a second line for the filling. If you have two or more components that are baked together, you may indicate one finished weight for those components. If you are selling a mix, use the first line for the mix and then on subsequent lines, indicate the ingredients that the consumer adds but make sure it is clear that these ingredients are ingredients to be added to the mix. You will need to fill out a separate line for each component that you have listed.
