Name Those Bones

DIRECTIONS: Go to portaportal.com and enter mrbucsscience in the guest sign-in box. Go to the menu entitled "anatomy."

1. Use the website "bone names" to find the names of the bones you will be responsible for knowing. Practice naming the bones on the websites "Label the Skeleton" and "match the label with the bone."
2. You have 2 skeleton diagrams below. One should be left blank. Once you have learned the names of the bones, label skeleton diagram below. Use the "bone bank" to help you.
3. Use the blank skeleton diagram to **study with your partner.** Quiz each other until you feel ready to take the "bone challenge" (to be explained).
4. When you have completed 1 - 3, you may "bone up" on your skeletal naming skills by using the websites: "The skeleton game," "Mr. Bones," and "skeleton shakedown."

Bone Bank

clavicle, vertebra, sternum, mandible, femur, tarsals, tibia, ulna, pelvis, radius, carpals, femur, phalanges, rib, patella, fibula, cranium or skull, humerus
