

Plants are alive, too!

Observations

When we think of living things, we often think of animals. After all, animals move by themselves, grow, feed, react, and reproduce. Although plants do not move from place to place by themselves, they do grow and reproduce. Plants are living things, too.

Science activity

Draw a line joining each whole plant to the part of it that will grow into a new plant.

Science exploration

See if you can find an *oruba* plant or prayer plant. What happens to its leaves at nighttime? What type of life activity is this?
