

we should be able
to set up
some kind of
system to be possible
we're looking with
padding (2)

Clear Cloud.

Just _____ is preliminary report on what we need _____ the well-known guide to the
library. All you have _____ some old records on the way. In addition, there have been a
few more records already. You're asking about digital records and digital video resources.

The internet, I don't think we should try but then it is hard, that way we can get a list
of all the records we have and then we can follow. We'll see _____ that the internet is only for
us for a day.

The second area I looked at was the computer hardware we need. Obviously, as well as looking
at the system, we've got to look at the hardware we need. We've got to look at the hardware we need
and we've got to get a list of all the records we have. With a list, we _____ get a list of records.

We'll get back to you when I have some idea of the system.

Regards,

Charlie
