

Latitude and Longitude Worksheet

1. a. Name two countries that the equator passes through.

 - b. Name two countries that the prime meridian passes through.

2. The terms in the first table are mixed up. Enter them properly in the second table.

latitude	equator is axis	range is 0 to 90	how far north or south	x-axis
longitude	prime meridian is axis	range is 0 to 180	how far east or west	y-axis

latitude				
longitude				

3. Which two locations are written correctly?

10°N 20°S	8°E 30°W	10°S 170°W	100°N 120°E
3°N 170°E	7°S 190°W	30°W 57°N	35°E 85°N

4. Add the continents Australia, Asia, South America, and North America and half of the countries Iraq, Argentina, Canada, Bolivia, Germany, Mexico, Zambia, and New Zealand to the table.

Quadrant	Continent in quadrant	Country in quadrant
NW		
NE		
SW		
SE		

5. Fill in the column for name.

Description	Name
A country straight east of Phoenix	
A country straight west of Phoenix	
A country straight north of Phoenix	
A country straight south of Phoenix
