

# PARTIAL PRODUCTS

**Step 1:**

Multiply one digit at a time to get the product.

**Step 2:**

List all the partial products.

**Step 3:**

Add them all together.

$$\begin{array}{r} 10 \\ 23 \\ \times 12 \\ \hline \end{array}$$

6	$2 \times 3 = 6$	}	multiply to get
40	$2 \times 20 = 40$		
30	$10 \times 3 = 30$	}	multiply to get
+ 200	$10 \times 20 = 200$		

$$\begin{array}{r} 276 \\ \hline \end{array}$$

These **partial products** help to solve.
