

Exploring the Contributions of African American Scientists

Name _____

Use this worksheet to record information about your scientist. You will need to research your subject. Locate information about his/her early life, educational achievement, and the contributions that your subject made to society. Also include the obstacles that your subject had to overcome. You will prepare a slide presentation to share information with the class.

1. Who is the scientist that you selected?
2. When was he/she born? Died?
3. Where did the person spend his/her early life?

4. What schools and universities did your scientist attend?

5. What did this person contribute to society?

6. Who influenced this person's life?

7. What awards or special recognition did this scientist receive?

8. What do you admire most about this person?

9. What obstacles did the person overcome?

10. References for Works Cited List:
