

So Many Germs!

Germs just love animal fur and feathers!
So much that they live all over them.
So much that they share their food, litter trays, baskets.
They are everywhere, in large numbers.

What's that itch?
In the grid, find the name of each of the animals and circle them.
Four letters will be left. Write them in the boxes below: you will find an
insect which especially loves animals' coats.
