## Second Grade Math Problem Solving Worksheet

GLE 0206.1.2 Apply and adapt a variety of appropriate strategies to problem solving, including estimation, and reasonableness of the solution.

### How Many Legs

1. Johnny looked out of his treehouse and saw a group of cats and birds passing by. She counted all the legs of the birds and cats. He counted 6 birds and 5 cats. How many legs did he count altogether?

Circle the label you will use.

Does each animal have the same number of legs?

Draw a picture to help you solve the problem.

Answer: \_\_\_\_\_

.....

Caitlyn and Blake went to the store to buy a toy train. The train cost \$2.79. They gave the store clerk a \$20.00 bill. About how much money will they get back?

Round the amount of the train up to the nearest dollar.

Subtract that amount from \$20.00.

Answer: \_\_\_\_\_

.....

There are three jars. The first one has 19 marbles in it. The second one has 22 marbles in it. The third one has 50 coins in it. About how many marbles are in all the jars?

Do all the jars have marbles?

Round the number of marbles up to the nearest 10.
