

Take a sheet of paper, preferred gloss or silk as is the most we have in stock and fold it half following the dotted line.

Draw on one side of the paper half of the mouth and half of the nose and cut out folded. Fold again following the dotted line.

Now you only have to unfold the sheet of paper and enjoy your creation. The bigger the sheet of paper the better and funnier.

Draw on the eyes and cut out and if you want to add all other features. You can fold more times and make ears.
