

- Very important!
- The correct order you work out a math problem

Remember by "PEMDAS"  
 Please Excuse My Dear Aunt Sally.....

What is the order? PEMDAS

1. P - parenthesis - do what's inside first
2. E - exponents/powers next
3. M/D - multiplication/division from left → right

$3(6 + 2^2) \div 15 + 5$	Example
$3(\underline{6 + 2^2}) \div 15 + 5$	P
$3(6 + \underline{4}) \div 15 + 5$	E
$3(\underline{10}) \div 15 + 5$	M
$\underline{30} \div 15 + 5$	D
$2 + 5$	A
