

- Very important!
- The correct order you work out a math problem

Remember by "PEMDAS"
 Please Excuse My Dear Aunt Sally.....

What is the order? PEMDAS

1. P - parenthesis - do what's inside first
2. E - exponents/powers next
3. M/D - multiplication/division from left to right

Example

	$3(6 + 2^2) \div 15 + 5$	Example
P	$3(\underline{6 + 2^2}) \div 15 + 5$	
E	$3(6 + \underline{4}) \div 15 + 5$	
M	$\underline{3(10)} \div 15 + 5$	
D	$\underline{30 \div 15} + 5$	
A	$2 + 5$
