- Very important!
- The correct order you work out a math problem
- Remember by "PEMDAS"

Please Excuse My Dear Aunt Sally .....

What is the order? PEMDAS

1. P - parenthesis - do what's inside first
2. E - exponents / powers next
3. M/D - multiplication / division from left → right
4. A/S - addition / subtraction from left → right

Example $3(6+2^2) \div 15 + 5$

P $3(\underline{6+2^2}) \div 15 + 5$

E $3(6+\underline{4}) \div 15 + 5$

M $\underline{3(10)} \div 15 + 5$

D $\underline{30 \div 15} + 5$

A $2 + 5$
