

SCIENCE - GRADE 3

Name: _____ Class: _____ Parent's Signature: _____

Process skills

- Analyse : the functions of different plant parts
Infer : what would happen to a plant if a part is missing

Aim: To recognise that different plant parts carry out different functions to keep the plant alive.

1. The sentences below describe the functions of different plant parts. Identify the plant part that fits each description.

Functions	Plant part
(a) It makes food for the plant.	
(b) It supports the plant. It has many tubes inside it. The tubes carry useful materials from one part of the plant to another.	
(c) It holds the plant firmly to the ground. It takes in water and minerals for the plant.	
(d) It develops into a fruit that contains seeds.
