

Name / Group: _____

My Water Cycle Data Collection Sheet

Instructions:

For the next five days you will collect data to find out how much precipitation has occurred. You will measure the amount of water in your rain gauge. At the end of 5 days, you will work with your group to create a graph (bar, line graph, pictograph, etc.) to show how much precipitation has occurred over a period of five days. Your data and graph must also be included in your final presentation.

Days	Type of Precipitation (rain, snow, dew, etc.)	Amount of precipitation collected (inches)	Observation: (What did you notice differently today than on other days?)
Day 1			
Day 2			
Day 3			
Day 4			
Day 5			

What I discovered / conclusion:
