

Name: _____

Producers and Consumers

Producers create products and services. Consumers use these products and services.

Directions: Think about what goods and services your family uses each day. Which goods and services require you to pay, and which are free? Think about ways your family might produce goods and services. For example...do you help with the laundry? You are providing a service. Do you bake brownies for the bake sale? You are producing a good.

Goods my Family Consumes	free or pay?

Services my Family Consumes	free or pay?

Goods and/or Services my Family Produces	free or pay?
