

# First and Then

Solve each problem.

$(5+6) - (10+1) = \underline{\quad}$

$(8-2) + (9-3) = \underline{\quad}$

$6 + (9 \div 3) = \underline{\quad}$

$(9 \div 3) + 3 = \underline{\quad}$

$(4-1) \times (7-2) = \underline{\quad}$

$4 + (2 \times 5) = \underline{\quad}$

$2 \times (2 \times 4) = \underline{\quad}$

**First** do work in parentheses.  
**Then** solve the problem.
