Positive fractions are fractions with the positive sign (+) and their values are greater than 0.

For example, $+\frac{2}{9}$, $+\frac{1}{7}$ and $+\frac{5}{8}$ are positive fractions. They can also be written without the sign, that is as $\frac{2}{9}$, $\frac{1}{7}$ and $\frac{5}{8}$.

Negative fractions are fractions with the negative sign (−) and their values are less than 0. For example, $-\frac{2}{9}$, $-\frac{1}{7}$ and $-\frac{5}{8}$ are negative fractions.

In a number line, positive fractions are to the right of zero, whereas negative fractions are to the left of zero.
