

Biology Worksheet – Circulatory & Respiratory Systems

Name: _____

Organ systems interrelationships – Think about the main functions of the organ systems

1. What does the skeletal system do for the muscular system?
2. What does the skeletal system do for the respiratory and circulatory systems?
3. What does the muscular system do for the skeletal system?
4. What does the muscular system do for the respiratory system?
5. What does the muscular system do for the circulatory system?
6. What does the respiratory system do for the circulatory system?
7. What does the respiratory system do for the muscular system?
8. What does the respiratory system do for the skeletal system?
9. What does the circulatory system do for the respiratory system?
10. What does the circulatory system do for the muscular system?
11. What does the circulatory system do for the skeletal system?
