pituitary gland	corpus luteum	fetus	ovary	prostate gland	testosterone
follicle-stimulating hormone	egg	GnRH	oviduct	scrotum	urethra
human chorionic gonadotrophin	endometrium	gonad	ovulation	semen	uterus
luteinizing hormone	epididymis	menstruation	oxytocin	seminal fluid	vagina
seminal vesicles	embryo	menstrual cycle	placenta	sperm	Vas deferens
seminiferous tubules	estrogen	ovarian cycle	progesterone	testis	zygote

Identify each key term by its definition. Some definitions will have more than 1 term.

Key Term	Definition
1.	the male gamete
2.	the shedding of the endometrium
3.	female sex hormones responsible for building the endometrium
4.	the baby between weeks 9 & birth in the womb
5.	structure that holds the male gonads outside the body & keeps it cooler
6.	hormone that stimulates the follicle to grow; stimulates secretion of testosterone & female sex hormones
7.	the single-celled offspring
8.	the canal where the baby exits
9.	fluid that moves sperm
10.	part of the brain that secretes sex hormones
11.	organ where the offspring develops
12.	the nutrient-rich lining of the uterus
13.	the ruptured follicle; yellow body
14.	structure that hold gametes
15.	the offspring when it implants into the mother's womb until week 8
16.	the male sex hormone
17.	the releasing of a mature egg
18.	the female gamete
19.	structure that holds male gametes
20.	cycle responsible for regulating the life of the egg
21.	hormone that stimulates the release of FSH & LH
22.	hormone that indicates pregnancy; increases release of female sex hormones
23.	the tube that carries the male gametes out of its storage place
24.	structures that produce the fluid that moves sperm
25.	storage place for the male gametes
26.	where male gamete formation starts
27.	structure that holds the female gametes
28.	combination of sperm & seminal fluid
29.	hormone that stimulates female gamete to mature & male gamete production
30.	hormone that stimulates birth contractions & milk production
