<u>Grade 4 Math</u>
<u>Word Problems Set #1</u>

Name - _____
Date - _____

To answer the following problems, you will have to read each question carefully and decide on a strategy to solve the problem. Pick out the key words to help you. Your work should be done in your math workbook. Show how you found your answer and write your answer in a complete sentence. Good luck!

1. Ming has 40 stamps. Joseph has 34 more than Katie. Katie has 50 stamps more than Ming does. How many stamps does Joseph have?

2. Michael is playing a video game. For every 800 points, he gets a new life. Right now, he has 468 points. How many more points does he need to get a new life?

3. Rachel has 400 cookies. She gave 42 of them to each of her 6 friends. How many were left over?

4. A restaurant sold 11 boxes of lobster, which had 20 lobsters in each box, and 19 boxes of 30 shrimp in each box. How much seafood did they sell altogether?

5. There were 28 engineers (mapmakers) who were invited to a party. Another 23 engineers were invited to the party from another company. Four of these engineers had made big mistakes on their last project. They messed up on 2 of the maps they were working on. How many engineers made it to the party?
