

How many values does  
the variable  $x$  take?  
Write down the values.

How many values does  
the variable  $y$  take?

How many values does  
the variable  $z$  take?

How many values does  
the variable  $w$  take?

How many values does  
the variable  $v$  take?

How many values does  
the variable  $u$  take?

How many values does  
the variable  $t$  take?

How many values does  
the variable  $s$  take?

How many values does  
the variable  $r$  take?

How many values does  
the variable  $q$  take?

How many values does  
the variable  $p$  take?

How many values does  
the variable  $o$  take?

How many values does  
the variable  $n$  take?

How many values does  
the variable  $m$  take?

How many values does  
the variable  $l$  take?

How many values does  
the variable  $k$  take?

How many values does  
the variable  $j$  take?

How many values does  
the variable  $i$  take?

How many values does  
the variable  $h$  take?
