

Pythagorean Theorem Worksheet

Heading:

Draw a right triangle and label the legs, and hypotenuse. Then, state the Pythagorean theorem.

In a right triangle where a and b are the legs and c is the hypotenuse, use the given information to find the missing side. SHOW ALL STEPS. Write the best approximate for each problem.

1. $a = 12, b = 16$

6. $a = 4, b = 6$

2. $a = 3, b = 8$

7. $a = 11, b = 19$

3. $a = 6, b = 7$

8. $a = 20, b = 22$

4. $a = 9, b = 15$

9. $a = 8, b = 14$

5. $a = 10, b = 17$

10. $a = 25, b = 26$
