How to Become a Software Tester by Roman Savenkov

Anna Sobolevsky

17 Beautiful Way, San Francisco, CA 94118

Cell Phone: 415-000-00-00

Email: anna@qatutor.com

Objective:

Position of entry level Test Engineer

Note to the potential employer:

I'm applying for my first job as a Test Engineer. I'm a smart, hardworking person who will perform above and beyond if you give me a chance. Please consider me.

**I'm willing to work unlimited hours.
I'm willing to work weekends and holidays.
I'm willing to work for minimal pay.**

Personal Summary:

Strong problem-solving skills using a logical methodology. Self-motivated, strong organizational skills, reliable, capable of learning new technical skills quickly. Able to work under tight deadlines and rapidly changing priorities. Detail oriented and able to multitask. Works well with others as well as independently. **Committed to sacrifice personal life to deliver high quality product on time.**

Beta Testing Experience:

Google, Inc. Project: Experimental Search.

Actively participated in the following subprojects:

- Alternate views for search results
- Keyword suggestions
- Keyboard shortcuts
- Left-hand search navigation
- Right-hand contextual search navigation

Found and reported to the Labs (labs+search@google.com) 3 P2 bugs found in keyboard shortcuts.

Created a user experience overview with a list of 12 feature requests and suggestions and sent it to the labs.
