# Simple Machines

Look at the pictures below and label each with the type of simple machine it represents:

Match each simple machine to its description.

Lever •

• Used to lift or move loads with a wheel and rope.

Wheel •

• A flat surface set at an angle.

Inclined Plane •

• A bar that pivots on a fulcrum.

Wedge •

• An inclined plane wrapped around a cylinder.

Screw •

• A device that splits objects apart.

Pulley •

• A larger wheel attached to a smaller axle.
