

## COUNTING AROUND THE THOUSANDS.

When counting up or down in tens or hundreds, the tens or hundreds always stay the same when the tens or hundreds change.

Look at the examples below and note that when adding (less) the tens always stay the same and when adding or subtracting the tens and units always remain the same.

e.g. counting in tens from 470

Counting in tens from 600

Counting in hundreds from 470

Counting in hundreds from 1 700

Have lots of go at reading the above numbers out.
