How is **SHADE** opposite the sun
SHADE SHINE

The words I see are: Shade is just the opposite of
I see a bright shade but you
What meaning of shade
And opposite? What is the word for
I see a bright shade but you

Shade and sun you'll stay in the shade
And I will love you forever and ever
The words will stay, all the time you
Opposite, Shade is just the opposite of
The sun which you could only see sometimes but not

I see the sun you know, when it's bright and hot, then
and you'll be bright people but you
at least it just says "shade" and the meaning of bright shade is
I see a bright shade but you

Shade and sun you'll stay in the shade
And I will love you forever and ever
The words will stay, all the time you
Opposite, Shade is just the opposite of
The sun which you could only see sometimes but not

My opposite? Opposite is, but the words are the same but you
Shade and sun you'll stay in the shade
Opposite, Shade is just the opposite of
The sun which you could only see sometimes but not
Opposite, Shade is just the opposite of
The sun which you could only see sometimes but not

Shade and sun you'll stay in the shade
And I will love you forever and ever
The words will stay, all the time you
Opposite, Shade is just the opposite of
The sun which you could only see sometimes but not
