

Atmosphere: Atmospheric Issues Study Guide

Terms

Troposphere	Tropopause	Stratosphere	Stratospheric Ozone
Mesosphere	Mesopause	Chlorofluorocarbon	Air Pollution
Thermosphere	Thermopause	Aurora Borealis	Greenhouse
		Green Equatorial	

Concepts

1. The temperature trends between each of the atmospheric layers.
2. The primary wind throughout the atmosphere.
3. The main gases found in the atmosphere.
4. How each gas is found in the atmosphere and what they do.
5. What ozone does/ where it is found.
6. What each of the atmospheric layers are.
7. The reason of each of the atmospheric layers.
8. What the effects are of each layer both on the environment and humans.
9. Important facts about each layer.
10. How things that people can do actually prevent the layer from getting worse.
