

Singapore 3rd Grade Math Worksheet: 5
Multiplication and Division

Name: _____

Date: _____

Math Problem 1

Green aliens landed in Chicago and rounded up 1479 math teachers. The bloodthirsty aliens then sucked the blood of 828 teachers and left them for dead. The aliens tied up the rest of the teachers and marched them into 3 UFOs. If there were an equal number of poor math teachers in each UFO, how many teachers were in each UFO?

Math Problem 2

My 3 friends and I were caught and tied up by 1023 screaming cannibals in a jungle last night. Soon we were feeling terribly itchy because of the mosquitoes. We begged the cannibals to scratch us. 219 cannibals refused because they were busy cutting vegetables. The rest of them, however, surrounded us in equal numbers and began to scratch us with their teeth, just like dogs. It felt good! How many cannibals scratched me?
