Direct Variation Worksheet

Tell whether the equation represents direct variation. If so, identify the constant of variation.

1.
$$y = 8x$$

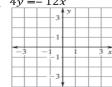

2.
$$y = 2x + 1$$

3.
$$3x + y = 6$$

Graph the direct variation equation.

4.
$$y = \frac{1}{2}$$

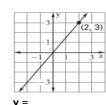

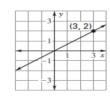

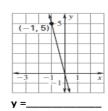

The graph of a direct variation equation is shown. Write the direct variation equation.

Then find the value of y when x = 10.

Tell whether the table represents direct variation. If so, write the direct variation equation.
