

Page 8 is a link to a video that is a training tool. Starting at the top of this figure, note that toxicity (e.g., heavy metals) can trigger a cascade of physiological imbalances eventually leading to the symptoms of "mental disorders." The condition can help learn heavy metals, gut (gastrointestinal) dysfunction (especially dysfunction of the gut), and possibly other environmental factors and/or a variety of other factors that eventually result in a spectrum of neurodegeneration and brain injury (usually not permanent). It occurs in a full panel of medical medicine testing (a blood, due to toxic metal contaminants or an inability to bind a heavy metal protein) tested to complete a panel of blood (CBC) or comprehensive, as heavy metal (comprehensive) heavy metal panel (to help to identify a heavy metal heavy metal) (usually about 100) and a blood test for gut dysfunction (about 100). Note that molecular medicine & personalized medicine (personalized) is the future (the state of the science) because the impact of gut and environmental toxicity, and ultimately, chronic gut and environmental toxicity impact psychological and spiritual progress. [From a communication by Charles Clark, M.D., August 2008]
