## Blood Cells Worksheet

1. What is the best trick to help me find the right height to position the nosepiece of my microscope at in order to see cells?
2. What is a “nucleus”?
3. What type of cells is most common in blood?
4. On the back of this sheet, label all white blood cells with letters (A, B, C . . .), using **the same letter** for cells that you think are the same **type** of white blood cell.
